## PROFILE

Frontend-focused software development engineer with hands-on experience building responsive, user-centric web applications using React, JavaScript, and modern UI frameworks. Strong understanding of component-based architecture, authentication flows, API integration, and state management. Actively enhancing core software engineering skills alongside advanced academic training in M.Tech [↗](#) (Computer Science).

## EDUCATION

**Master of Technology,Computer Science**  
SRM Institute of Science and Technology-Chennai  
2025 – Present | Chennai

**Bachelor of Technology Computer Science**  
Pranveer Singh Institute of Technology-Kanpur, Uttar Pradesh  
2018 – 2022 | Kanpur

## SKILLS

Html | CSS | Javascript | React | Git |  
Github | Tailwind | Material UI | Python | Java

## Languages

Hindi   
English

## Interests

Cricket | Badminton

## PROJECTS

### Parento – Full-Stack Parent–Child Management Platform [↗](#)

09/2025 – 01/2026

- Developed a full-stack web application to manage parent–child interactions with secure role-based authentication.
- Implemented user registration, login, and protected routes using Appwrite Authentication.
- Built dynamic dashboards using React with efficient state management and real-time data rendering.
- Designed a fully responsive UI with reusable components to ensure scalability and cross-device compatibility.

### Blog App [↗](#)

08/2023 – 12/2023

- Built a full-stack blogging platform with authentication and authorization using Appwrite services.
- Implemented CRUD functionality for blog posts along with image uploads and media storage.
- Designed reusable React components and optimized application state flow for better performance.
- Ensured protected routes so only authenticated users could create, edit, or delete content.

### 3D T-Shirt Customizer – Interactive WebGL Application [↗](#)

05/2024 – 06/2024

- Developed an interactive 3D T-shirt customization platform using Three.js and WebGL.
- Enabled real-time color, texture, and logo customization on 3D models.
- Integrated React with 3D rendering logic, managing complex UI and state updates efficiently.
- Optimized rendering performance to ensure smooth user interaction and modern user experience.
